

GenoFast MOLECULAR DIAGNOSTICS (IVD Medical Devices Class IIb & III – EU Council Directive 98/79/EC)

(Product literature available upon request)

Catalog No.	Description	EDMA No.
HPV - MHPVF-B	Detects 15 types of High Risk Human Papillomavirus (HPV)- real time isothermal amplification detection	15 04 08 03
HPV- MHPVF1618-B	Detects 15 types of High Risk Human Papillomavirus (HPV) in a single tube with real time isothermal amplification fluorescent detection and simultaneous genotyping of HPV 16 and 18	15 04 80 03
HPV- GHPVF-B	Genotyping 15 types of High Risk Human Papillomavirus (HPV) with real time isothermal fluorescent detection	15 04 80 03
HPV- MHPVPCR-B	Detects 15 types of High Risk Human Papillomavirus (HPV) in a single tube with PCR amplification analysis.	15 04 80 03
HPV- MHPVPCR1618-B	Detects 15 types of High Risk Human Papillomavirus (HPV) in a single tube with PCR amplification analysis and simultaneous genotyping of HPV 16 and 18	15 04 80 03
HPV- GHPVPCR-B	Detects genotype 15 types of High Risk HPV with PCR amplification analysis.	15 04 80 03
CT-100-B	Detects Chlamydia Trachomatis (CT) in a single tube with PCR amplification analysis.	15 01 01 03
CD-100-B	Detects Clostridium Difficile (CD) in a single tube with PCR amplification analysis	15 01 90 02
CB-100-	Detects Coxiella Burnetii (CB) in a single tube with	15 01 90 03

	PCR amplification analysis.	
	tube with PCR amplification analysis.	
NG-100-B	Detects Neisseria Gonorrhoeae (NG) in a single tube With PCR amplification analysis.	15 01 02 01
YP-100-B	Detects Yersinia Pestis (YP) in a single tube with PCR amplification analysis.	15 01 90 03
BA-100- B	Detects Bacillus Anthracis (AB) in a single tube with PCR amplification analysis.	15 04 40 01
FT-100-B	Detects Francisella Tularensis (FT) in a single tube with PCR amplification analysis.	15 70 01 00
HA-100-B	Detects Haemophilus (HA) in a single tube with PCR amplification analysis.	15 01 40 05
LE-100-B	Detects Legionella (LE) in a single tube with PCR amplification analysis.	15 01 05 01
LI-100-B	Detects Listeria in a single tube with PCR amplification analysis.	15 01 13 01
SA-100-B	Detects Salmonella in a single tube with PCR amplification analysis.	15 01 10 01
STA-100-B	Detects Staphylococcus in a single tube with PCR amplification analysis.	15 01 12 01
STR-100-B	Detects Streptococcus in a single tube with PCR amplification analysis.	15 01 11 01
TRI-100-B	Detects Trichomonas vaginalis in a single tube with PCR amplification analysis.	15 01 90 01
MP-100-	Detects Mycoplasma Pneumonia (MP) in a single	15 01 08 01
